Night at Christ Church
Cathedral."What is the prophecy and prophetic
writings bearing on the present war?"
was the subject of Dr. Symonds' ser-
mon at Christ Church Cathedral last
night.There is a danger, said the preacher,
to take the words of the Bible nowa-
days, and distort them to suit any
meaning whatever. This is simply an
expression in crude form of the yearn-
ing for occult knowledge, knowledge
without examination. Our Lord Him-
self deprecated this unseemly desire
for signs.What is a Prophet? Dr. Symonds
then went on to explain the true sig-
nificance of this term. It is not first
and foremost one who foretells. This
is a purely derived meaning, and has
nothing to do with the proper applica-
tion of the word. The prophet is one
who brings tidings or speaks for some-
one, and the prophet of the Bible is the
bringer of God's news; a preacher.
Also, however, the prophet has to do
with the future, but only in a slight
way; first when he speaks of the fu-
ture coming of rain for instance. This,
of course, is the least important oc-
casion of prediction. Then, he speaks
of the far and distant future, and this
in turn can be in reference to vague
happenings and, secondly, of things
to do with the coming of the Messiah.
The great glory of Hebrew prophecy
is that it always represents the might
and beauty of the Messiah. His moral
and spiritual glory. No definite date
is set for his coming and from this
we can see how vague any feeling of
prediction was. The prophets were
very fond of mysterious symbols in
their words, and these have been the
source of great use to the interpreter
who wishes sensation.How are we to interpret these
books? Are we to apply the prophecies
to Napoleon Bonaparte or the Kaiser?
We must remember that the writers
were endeavoring to help their peo-
ple. Would they be likely to foretell
great disasters and thus to make the
prosperous more gloomy than ever to the
poor people. The modern interpreter
can make any figure mentioned in the
Bible by a little judicious juggling, ap-
ply to any present circumstances.Take the number of the beast 666,
says the Book of Revelation. Letters
now, used to be used for figures. Dr.
Salmon says that this 666 has respec-
tively been proved conclusively to
mean Nero, Caligula, Trajan, Julian
the Apostate, Pope Benedict IX., Ma-
homet, Luther, Calvin, Pilsa, Napoleon,
and finally the Kaiser.Dr. Salmon, who has written an in-
teresting work on this subject, says
that by proper use of Roman figures
he could at the time when Parnell was
the great agitator in favor of Home
Rule, have made this beast and his
number point undeniably to Parnell,
and eventually to the system of boy-
cotting.But to return. The prophets wrote
for their own people; and they also
undoubtedly looked forward dimly but
profoundly to the future. They can-
not tell what is going to happen, and
hence we are not to take their groping
words for direct references to com-
ing disasters. In reality, these prophe-
cies of calamity and wars, are but
their realization of the eternal conflict
between right and wrong, which are
real and personal. Their messages
then, are messages of hope, for a
happy and successful result of the con-
flict.And we see that these struggles
have continued all through the ages.
This is why we can trace similarities
between the present war and the vivid
tableaux described in the books of the
prophets.If we trace out the events of the
great fight between right and wrong
through all past history, do we not see
how in every case the right has
triumphed. It is by viewing the mighty
words of the prophets as universal in
meaning. As applying to great world-
wide and eternal facts that we can get
nearest to their broadest and best
meaning.**LOST.**A silver cigarette case in McGill

THIS EVENING**Arts '18 and '19 and Law '17 and
'18 Will Meet.**EVERYBODY TURN OUT**Support the Literary Society by
Putting in an Appearance
To-night.Arts '19 and Arts '18, Law '18 and
Law '17, will meet, respectively, this
evening in the opening debates of the
year, under the auspices of the rejuv-
enated Literary and Debating Society
of McGill. The two contests promise
to be of the keenest character, as the
men of the two teams are full of their
subjects, and all are very strongly con-
vinced that the views which they are
upholding are the only ones which will
hold any water at all.For the Law teams, the subject is
one which has been holding the atten-
tion of several prominent lawyers and
judges throughout the Dominion of
Canada. The question is whether
women should or should not be admit-
ted to practice at the Bar. The case
of Mrs. Langstaff springs immediately
to the mind, and any who have any
interest whatever in matters to do
with law will have a good chance to
listen to some of McGill's foremost
future lawyers deal with the subject,
and they will also have ample oppor-
tunity to air any views they hold.The Arts team have an equally vexed
question to discuss. That of early
closing will be threshed out to the bot-
tom, and on the decision arrived at by
the youthful debaters will doubtless
rest much of this country's future des-
tiny.The Lit. is on its trial to-night, and
it is up to the students to support it
and start it out on its way success-
fully.**COURSE IN ALGEBRA.**Lectures Given In Connection With
School of Commerce Extension
Classes.A special course of lectures in Al-
gebra in connection with the Extension
classes of the School of Commerce has
been opened with T. Ridler Davies,
B.A., Assistant Professor of Mathe-
matics, as the lecturer. These lec-
tures are held on Thursday evenings,
at 8.30, and have been arranged in
order to meet the needs of candidates
for the Intermediate Examination of
the Association of Accountants in
Montreal, and of candidates for the ex-
aminations of the Civil Service of Can-
ada.**HUT FOR THE Y.M.C.A.**Major Gerald Birks Approves of the
Idea For Active Service Branch.Major Gerald Birks, who is acting as
head of the Canadian Y.M.C.A. over-
seas, has approved of the building of
a hut to replace the marquee now in
use by the active service branch of the
McGill Y.M.C.A. at No. 3 (McGill)
General Hospital. A cablegram to this
effect was received by E. A. Corbett,
general secretary of the McGill Y.M.
C.A., yesterday. The sum of \$400 was
required to build this hut, and of this
\$300 has already been subscribed.**FIRST AID AT THE R. V. C.**On Friday, Nov. 12, at 5 o'clock, Dr.
Tees will give his first lecture, "First
Aid to the Injured." The fee is three
dollars. Books and bandages can be
obtained at the office, and any student
of the college wishing to join this class
is asked to give her name as soon as
possible to the secretary, Miss Mar-
shall.**What's On****To-day.**2.00—Philosophical Society picture,

FOR THE Y.M.C.A.**Fourth Year Science Does Mag-
nificent Work.**FACULTY ALSO LEADS**Arts Faculty Close Second, With
First Year in the
Lead.The financial campaign held last
week by the McGill Y.M.C.A. closed
on Saturday, and the results show
very well the attitude of the student
body towards this deserving work the
Y. M. is now doing.Although so many attacks are made
this year on the students' purse, the
response to this call has been most
heartily in spite of hard times. It is
encouraging to find the students are
realizing the task undertaken by the
Y.M.C.A., and that they are so will-
ing to assist in this financial manner.The following is a summary of the
amounts collected by the various
classes:

Science.	
First year	\$53.50
Second year	52.00
Third year	77.50
Fourth year	94.00
	—\$277.00

Arts.	
First year	\$78.00
Second year	60.50
Third year	25.00
Fourth year	32.00
	—\$195.50

Medicine.	
First year	\$29.25
Second year	62.10
Third year	21.75
Fourth year	36.50
Fifth year	25.00
	—\$174.60

Law.	
First year	\$15.00
Second year	7.00
Third year	25.25
	—\$47.25

Theology.	
Presbyterian	\$26.50
Congregational	11.00
Diocesan	9.00
	—\$46.50

Miscellaneous.	
College friends and supporters who assisted in the campaign	60.00
Grand total	\$800.85

An analysis of these figures shows,
first of all, that the Science faculty
this year leads all the others by a sub-
stantial margin of \$81.50 over and
above the next highest amount, that
of \$195.50, from the Arts faculty.Special attention should be drawn
to the splendid record of the three up-
per years in Science. The amounts to
be appreciated must be compared with
the number of men in the class. The
fourth—i.e., with 78 men and \$94—is a
very creditable piece of work on the
part of all, and they are to be congrat-
ulated. The second year has only 50
men and the third year result is also
very good.With regard to the number of men
in each class, the showing of the dif-
ferent years in Arts, Medicine, Law
and Theology indicates that every man
must have done his best, both canvas-
ser and canvassed. First year leads in
Arts with \$78, and others proportion-
ately large. The same may be said
likewise concerning Medicine, Law and
Theology. There has been a general
evidence of good organization and
heartily response from the student body
to the appeal of the Y. M., and such
must be a source of great satisfaction
to those officers and men in the work
connected with this organization.**WORKERS FOR RED
CROSS ANNOUNCED**New Arrangement Made With
Regard to Overseeing
Work.The R. V. C. Red Cross branch has
decided that in order that all interest-
ed may do no more and no less than a
fair share of taking daily charge of the
work, four students, chosen from dif-
ferent years, shall be appointed for
each day to attend to the setting out
and putting away of material, oversee
the work done, and be in the common
room as much as possible. The four
for each day can arrange among them-
selves the hours most convenient. If
it is impossible for any one to take
charge on the day named, she must
produce a substitute.The following schedule has been
drawn up for the week commencing
Tuesday, November 9, and ending No-
vember 13:
Nov. 9.—Miss U. Adams, Miss R.
Ford, Miss E. Block and Miss Bertha
Baker.
Nov. 10.—Miss C. Caldwell, Miss G.
Gardner, Miss P. Burrell and Miss W.
Blampin.
Nov. 11.—Miss M. Cameron, Miss R.
Goodwin, Miss R. Mawson and Miss
Bernice Boyd.
Nov. 12.—Miss J. Elliott, Miss Ethel
M. Grey, Miss M. Corner and Miss G.
Craig.
Nov. 13.—Miss F. Fraser, Miss F.
Greer, Miss M. Currie and Miss N. Day.**BANK OF MONTREAL**

GRADUATES' DEPARTMENT

LIEUT. MULOCK DARING AIRMAN

Further Details of McGill Man's
Raid On City of Brussels.

HE DAMAGED ZEPPELINS

Beset by Difficulties of Fog,
Rain, and German Fire Ful-
filled Perilous Mission.

The thrilling story of how Lieut. Redford H. Mulock, Sci. '09, who is with the Royal Army Flying Corps, flew to Brussels and did damage to German Zeppelin sheds there, is told in a letter recently received from Major McKelvey Bell, of the Canadian Army Medical Services. Major Bell says:

"I saw one of the Canadian flying men, Lieut. Mulock, of Peterboro, who is attached to the Naval Flying Corps. He had just come back from a flight to Brussels. He started off in a mist and rain and flew over a mile high, above the clouds. He said that every time he came down a little to see where he was, the Germans opened fire on him, and fired so accurately that he had great difficulty in dodging the shells. After he had been traveling nearly an hour and a half, he came down through the clouds, and below was a great, big, beautiful city, the most beautiful city he ever saw, with wide streets and splendid buildings. He knew where the Germans had their aerodromes, and he made for one of them. It was a large building painted green and red and yellow, so that from a height it looked like the ground. He swooped down toward it, and the Germans opened fire on him with dozens of guns, so that shells burst all around him. Some of the shells were of a new type, which sent thousands of little balls or fire at him, with the idea of setting the aeroplane on fire.

Fire Was Terrible.

"He sailed through them all and dropped a bomb on the building, then made another circle and dropped another one and then another, and all the time the bullets were spinning past him. One bullet went through the machine, but did not hit him. Then he threw one more bomb and turned for home. The Zeppelin shed was on fire by this time. The rain was driving so hard that every time he put his head out to see where he was it cut his face so that he couldn't see where he was going. Then again he had only enough gasoline left to carry him straight home, and if he made a mistake he would have to descend into the German lines. He said that every time he came down a little to see where he was the Germans met him with showers of shrapnel, and it was dangerous to come down nearer than a mile from the earth.

"After a long while he came down a little and there was no firing. He thought that probably the Germans had not seen him, so he descended a little farther, and still there was no firing, so he concluded that he must be over France. He turned towards the coast, and when he got there he found himself almost home.

"Lieut. Mulock left Ottawa as a sergeant-major in the First Artillery Brigade with Lieut.-Col. Morrison. There are a lot of Canadian boys in the flying corps, and they are very brave and daring, and with all are just as modest over their exploits as the Englishmen."

Lieut.-Col. S. H. McKee, Med. '00, officer commanding No. 1 Stationary Hospital, C.E.F., is now in London suffering from an attack of dysentery. The hospital has been stationed for four months at Lemnos, and Lieut.-Col. McKee expects to return there upon recovery. He was previously for seven months in France.

Harold E. Whyte, Sci. '11, is a lieutenant in the Army Service Corps at Vernon, B.C.

F. A. Wilkin, Sci. '95, is lieutenant in the First Auto Machine Gun Brigade, C.E.F.

Paul Melhuish, Sci. '08, is on active service with a British Columbia Regiment. Before enlisting he was located at Vancouver.

Robert F. McIntosh, Sci. '06, is a sapper with the 6th Field Company, Canadian Engineers, on active service. His home is in Vancouver.

Pierre A. Landry, Sci. '03, is now a lieutenant in the 48th Battalion, C.E.F. He hails from Victoria, B.C.

Edward P. Heywood, Sci. '09, of Vancouver, B.C., is serving as lieutenant in the Royal Engineers.

Harry Earle, Sci. '11, is lieutenant in the First Battalion, Canadian Pioneers. He home is in Vancouver, B.C.

F. J. Dawson, Sci. '09, is lieutenant in the 54th Battalion, C.E.F. He resided previously at Kamloops, B.C.

Harold R. M. Christie, Sci. '08, is serving overseas as lieutenant and platoon commander in the 4th Scottish Rifles, Imperial Army. Previous to enlistment he resided at Kamloops, B.C.

Newton E. Drier, Med. '09, who has been practising at Vancouver, B.C., left for England last week. He has accepted a commission in the Royal Army Medical Corps.

Lieut. M. L. Gordon, Sci. '06, who went overseas with the 16th Battalion, C.E.F., has been wounded. He enlisted in British Columbia, where he was in practice as a land surveyor.

NOTICE

The Graduates' correspondent will be very glad to receive letters from graduates of McGill who are in active service, or from their friends. Any portions of such letters that are of a private nature can be omitted, and only such parts printed as contain information of general interest. Nothing is read more closely in these days than a letter from somebody in the service. As so many McGill men are known at least by name to their contemporaries at the university, their letters would possess a deeper interest for the readers of the Graduates' Weekly Number, since in a large number of cases the readers will know or know of the men who are writing.

All such contributions should be sent to W. B. Scott, Graduates' correspondent of the McGill Daily, 701 Royal Trust Building, Montreal.

Where it is desired to return the original letter, this will be done. In the course of time we should be able to have two or three letters each week for publication. Should the recipient of a letter from the front desire to have it published anonymously, this can also be done. We should also be glad to receive photographs of McGill graduates who are in the service in order that they may be reproduced in the columns of The Daily.

In the next issue of the Graduates' number of The Daily a roll of honor will appear, giving the names of all McGill men, past or present, who have enlisted for overseas service. This list is not yet complete, and the graduates can assist us materially by sending in names that inadvertently have been omitted. In this way we shall eventually obtain a complete record of what the McGill men have done and are doing for their country.

Moreover, the secretaries of the existing college organizations, such as the Football Club, Hockey Club, Historical Club, etc., can assist by looking up the records and advising us of men who have "gone to the front." The college fraternities should each be able to give us a complete list of the men who have enlisted from their respective chapters. Thus in the course of time we shall have every name, and future generations of McGill students will realize the ever-increasing part paid by McGill in the present war.

All information submitted should be sent to

J. A. NICHOLSON, ESQ.,
Registrar McGill University.

KEN. DOWIE ENGAGED.

Intercollegiate 120 Yards Hurdles Re-
cord-Holder Now in Japan.

News has been received at the University of the engagement of Kenneth W. Dowie, Arch. '12, to Miss Marion Osgood, of Tokio, Japan. Mr. Dowie, who was secretary of the McGill Y. M. C. A. for a year, is now engaged in missionary work in Japan, being at the same time a teacher in architecture at Tokio. Previously he spent some time in Formosa. He holds the intercollegiate record for the 120 yards hurdles which he set at Kingston in 1910. Mr. Dowie also holds the McGill record for this event.

OH, FOR A HOT BATH!

News of Other McGill Graduates
at the Front Or in Training
to Proceed There.

The following description of trench life is taken from a letter from a well-known McGill graduate, an officer with the First Universities Company: "Life in the trenches is a curious affair. I am writing in my dugout, which is quite comfortable. It contains a bed, a table with a drawer, half a dozen shelves, burlap walls, and, very swank, a window, not facing the enemy. Our boots and clothes are not removed, but, of course, I shave every morning and am able to do a little something for the backs of my ears also. The rest of me is a whitened sepulchre, or rather a browned one, the prevailing color.

"We have pretty good meals and the London papers of the morning before for breakfast. It is very quiet here just now and with the exception of sporadic bursts of hate from each side at odd hours of the day and night, very little to disturb the even tenor of our way—of course, our time will come, but in the meanwhile we should worry. That classic phrase is well established and can be used to express almost any state of mind or circumstance which may arise.

"I was out in front of the trenches the other night during some wiring operations and had my first experience of star shells, with nothing but air between me and the Bosch trenches. It wasn't nearly as terrifying as it sounds and as a steady diet much preferable to high explosives, shrapnel or whizz-bangs. We have had no real experience of the last-mentioned horrors as yet, however, having had them only in a very diluted form. It is a very healthy life, a statement which is, of course, subject to certain obvious modifications, and I am feeling very fit indeed. If I were in possession of a magic ring for a few moments I think a hot bath would be forthcoming at once."

Lieuts. Norman Scott, Sci. '15, Frank Fortier, Sci. '11, E. Garrow, Sci. '14, and Allan Scott, Sci. '11, are in training at the Canadian Engineers Training Depot, Ottawa, and expect to go overseas shortly.

Lieut. W. L. Lytleton Cassels, Sci. '13, was a caller at the Union yesterday. Lieut. Cassels, formerly editor of the McGill Daily and prominent in other branches of undergraduate activity, is going overseas shortly with a draft of the Canadian Engineers from the training depot at Ottawa.

"What Will the People Say?"

"What will the people say?" How often one hears such an expression of this sort, bolstered up by yards and yards of dissertation, when something happens, might happen, or does not happen in the University. The speaker, student or Faculty member, shudders for fear lest the benefactor will frown upon the University when the latter is in need, and the religious person trembles for fear some austere citizen will rob himself of the privilege of educating his son or daughter at the University, because a false or distorted report, or even the truth, regarding the University comes to his ear.

The University should by this time be big enough to stand as an institution of learning where educational, cultural, economic and religious ends are fostered unhampered by unfair, unfounded or prejudiced criticism from without. The University proposes to lead. How can it lead when a considerable number of its members are continually fearing that the wealthy man, or the prospective students' parents may not approve of something that is actually transpiring within the walls of the University and transpiring for the best interests of the State and humanity?

Why not the question: "Is this right?" or "Is this wrong?" instead of the question, "What will the people say?" After all, that is the thing the University is trying to do—to teach young men and young women to do and think the right and proper things. To do otherwise would breed superficiality, insincerity and hypocrisy.

The University should have no apologies to make.

Cambridge and the War

The effect of the war upon the university life of Great Britain was strikingly illustrated in the valedictory address, delivered by Dr. M. R. James, the provost of King's, at the opening of the new Michaelmas term at Cambridge recently. Dr. James, who was vacating the office of vice-chancellor, said that the university had shrunk to one-third of its former numbers. He went on to tell how its buildings, laboratories, lecture rooms and examination hall had been filled with soldiers; how many professors, readers and lecturers had gone out of residence to take up technical work, or commissions as officers; how yet others had placed their attainments, linguistic, economic, administrative, historical, at the service of the country, whilst those that remained were devoting themselves to tasks no less useful to the common welfare.

This condition of Cambridge, as set forth by Dr. James, is, of course, only typical of the position in all the older universities. In the case of the modern universities, such as those of Manchester, Leeds, and Liverpool, whilst there has been the same whole-hearted response to the call for help, the great need of the government for men trained in technical work, and the great need for trained men in the textile trade has kept a large number of students at their studies. Quite apart from the question of loss from a cultural point of view, which must be written down as one of the inevitable losses of war, there is the great question of finance, and it is just here that a short-sighted policy might appeal as the most advisable, and might, nevertheless, be attended by the reverse of good results. Cambridge, Dr. James explained, in spite of all the economies exercised by the university and college authorities, would enter the next civil year with a deficit of £2,000. An act of Parliament passed in the spring gave facilities to the university and the colleges for obtaining relief in certain directions, but that this has not been sufficient to meet the situation is evident from the vice-chancellor's statement. After an enumeration of the various acts of generosity and self-sacrifice attributable to members and friends of the university, Dr. James said that, in spite of all this, the financial prospect for 1916 could not but be gloomy.

There is, of course, a great latitude for debate as to which is the best method of dealing with a situation of this kind, practically unparalleled, as it is, in the history of university life in Great Britain, but that, ultimately, it will be seen to that the efficiency of the universities is not affected in any way, either by a burden of debt, or by an insufficiency of funds for due expansion, cannot be doubted.

McGILL HOSPITAL PLAYS FOOTBALL

No. 1 Canadian Hospital Wins by
a Score of 4-3.

In a recent letter from one of the members of No. 1 Canadian Hospital in France mention was made of a football game with No. 3 General (McGill),

It is presumed that "Dud" Cross, L. H. Montgomery and "Norm" Williamson were the stars. The McGill boys were beaten by a score of 4 to 3.

There is a league composed of the different hospital units, and several interesting games have been played. The writer states that the game was the most interesting that has been played yet.

STUDENTS' COUNCIL.

The Students' Council will meet this evening at 7.15.

12 OFFICERS FROM MCGILL

Many Graduates and Undergraduates in the Highlanders.

COMFORTABLE QUARTERS

The 73rd Will Remain in Northern Electric Building all Winter.

The 73rd Battalion of the Canadian Expeditionary Force, lately returned from Valcartier, and now stationed in Montreal, in the Northern Electric building, has 12 McGill graduates and students amongst its officers.

The commanding officer of the regiment is Lieut.-Col. Peers Davidson, who graduated from Arts in 1890, and then went into the Faculty of Law, where he received his degree in 1893. Five years later, in 1898, he entered the 5th Royal Highlanders of Canada, and in June, 1914, Lieut.-Col. Davidson succeeded to the command of the Second Battalion of this regiment. In 1911 this keen militia officer passed the course and obtained his staff officer's certificate, while all during the Valcartier camp this summer he was on the instructional cadre of the 4th Division.

The junior major, Major W. G. Peterson, is a graduate of the year of Arts 1906, and entered the 73rd from the Royal Canadian Regiment. He joined the 5th Royal Highlanders of Canada in 1910, and was on the 4th Division instructional cadre at Valcartier camp in 1915.

The adjutant, Captain H. W. Morgan, graduated from McGill in the class of Arts 1913, and was president of the McGill Daily during year of 1913. Capt. Morgan belonged to the 5th Royal Highlanders of Canada, and passed his examination for captain at the Royal School of Infantry in Halifax this year.

The medical officer of the 73rd, Lieut. L. S. Foster, is also a McGill graduate, belonging to Medicine 1909, and was previously in the Royal Army Medical Corps.

There are eight lieutenants in the 73rd Battalion who are either graduates or undergraduates of McGill University.

Lieut. H. S. Pedley graduated from Arts in 1909, and from Law in 1912, and entered the 73rd from the Canadian Army Service Corps and the 5th Royal Highlanders of Canada. This year he obtained his certificate from the McGill Contingent, C.O.T.C.

Lieut. G. S. McLennan belongs to Arts '17, and he broke off his college career last spring in order to enter the Canadian Engineers, from which regiment he was transferred to the 5th Royal Highlanders of Canada, and thence the 73rd Battalion, having obtained his certificates at the Provisional School of Infantry in 1915.

Lieut. Brian Simpson, a member of the McGill Contingent of the Canadian Officers' Training Corps, obtained certificate "A" from that corps, and joining the 5th Royal Highlanders of Canada, was subsequently admitted to the 73rd Battalion.

Lieut. H. M. Scott graduated in Science in 1901, and before enlisting for overseas service was a member of the Canadian Army Service Corps, and then the 5th Royal Highlanders.

Lieut. R. H. Mather is a Science graduate of 1913, and previous to joining the 73rd he was in the McGill Contingent, C.O.T.C., and then the 5th Royal Highlanders. Unfortunately a short time ago it was found that Mr. Mather's heart, upon further examination, proved not strong enough for overseas service, according to the medical authorities, so that Lieut. Mather will be unable to proceed to England with the unit, and will rejoin the 5th Royal Highlanders.

Lieut. P. P. Hutchison is another undergraduate belonging to Arts '16. Lieut. J. A. Ross was in his first year at McGill when he left to enlist in the 73rd, being a member of Commercial '17.

Lieut. G. A. Birks, of Architecture '19, is now in the 73rd, having left his year, where he was the only student to enlist in the 5th Royal Highlanders of Canada, and thence the overseas unit.

FOTHERINGHAM ACTING B.S.M.

Appointed to Succeed B.S.M. Werry Temporarily.

MUSKETRY EXAMINATIONS

Those Who Have Been Training As Instructors Will Be Put Through Paces.

BATTALION ORDERS No. 21,
by
LIEUT.-COLONEL ROBERT STAKEE,
O. C. McGill Cont., C.O.T.C.

Montreal, Nov. 6, 1915.

1. Details.
To be orderly officer for the week ending Nov. 13—Captain, F. S. B. Heward; Lieutenant, C. Heward.

Next for duty—Captain, A. Klugman; Lieutenant, J. H. Reid.
To be Battalion Orderly Sergeant for week ending Nov. 13—Sergeant, J. Marler. Next for duty—Sergeant.

2. Parades.
The Battalion will parade as follows during the week ending Nov. 13: Tuesday, Nov. 9—Students, 4.15 p.m. Non-students, 7.45 p.m. Thursday, Nov. 11, 7.45 p.m.

3. Musketry Examinations.
Examinations will be held at the High School Armoury on Monday, the 8th, and Wednesday, the 10th, at 7.45 p.m., for those men who have been training as musketry instructors. Men will attend as notified by their Company Commanders.

4. Appointment.
To be Acting Battalion Sergeant-Major during the absence of Sergeant-Major Werry—Company Sergeant-Major J. B. Fotheringham, "A" Company.

By order,
J. C. SIMPSON,
Lieutenant,
Act. Adj., McGill Cont., C.O.T.C.

Lieut. P. E. Corbett, of Arts '14, is also numbered amongst the officers of the 73rd Battalion, and while at college had the distinction of being McGill's Rhodes scholar.

The officers of the 73rd are now very comfortably quartered in the Northern Electric building at the corner of Guy and St. James streets. The officers' quarters consist of a spacious lounge room, where piano and gramophone serve to while away the off-duty hours, while adjoining this room are a number of smaller rooms used as card and music rooms. Near this lounge room is the officers' mess, where the officers of both the regiments quartered in the barracks have their meals. The two lower floors of the main building are devoted to the officers' and men's quarters of the other regiment, while on the third floor the 73rd officers and men sleep. The section of the building where the officers sleep is partitioned off into cubicles, which are assigned to various purposes, such as orderly and office rooms as well as bedrooms. The senior officers have their rooms to themselves, while the junior officers sleep two in a room. Ample washing facilities are provided for at the end of this great room. Rooms are also provided for the medical officer and transport officer, while desks and typewriters proclaim another large partitioned off room as being the adjutant's quarters. The men sleep in very large rooms that take up the whole of one floor. In these rooms are rows of wooden (upper and lower) bunks, as on a steamship. There is plenty of air and light in these quarters, while the bunks are spaced quite widely apart, giving lots of room. On the ground floor are the large mess rooms, each seating 250 men. At the end of each mess room are the camp kitchens that cook the food, and one stove is allowed for each table's use. The quartermaster's stores are also on the ground floor, as is the guard room and N.C.O.'s quarters. In spite of the disappointment of the officers and men in not being called upon to proceed to the front immediately, the Northern Electric building should prove very spacious and comfortable to the 73rd Battalion, C.E.F., until they leave towards the end of the winter, or in the spring.

EXCITING WEEK FOR THE "PATS"

Several Were Killed or Wounded Says Pte. Lightbody.

HAD A NARROW ESCAPE

Left Place in Trenches Where Man Was Killed, Just Before Whiz-Bang Came.

After a week in the trenches just thirty yards from the Germans, the Princess Pats, including the First and Second Universities Companies, were on October 19 in rest-billets, according to a letter just received from Pte. C. J. Lightbody, Theology '18, who left the Presbyterian College last year and enlisted with the First Universities Company. Pte. Lightbody writes:

France, Oct. 19, 1915.

Dear _____
We got out of the trenches last Friday night after an exciting week. Several of the boys were killed and wounded. One of the former was a clerk in the Bank of Montreal.

At present we are in billets for a rest period. Our trenches last week were only about thirty yards from the Germans', so that we were close enough.

You will be interested to know that I left the place where one of the boys was killed just a few minutes before the whiz-bang came. Several of us had been there for quite a time the day, and it seemed strange that all but two were away when the explosion occurred.

Major Gault returned here yesterday from England. He looks rather pale yet, but seems active.

We have a good meeting on Sunday night. I spoke on that text from Acts, "Whereupon, O King Agrippa, I was not disobedient to the heavenly vision." The boys said I spoke the best yet, which was most encouraging. The singing was fine, and we all enjoyed the meeting. These Sunday night "sings" mean quite a little, and tend to take us out of the rut of things.

I should be very glad to have a few copies of the McGill Daily. You could send a few together some time.

One of my sister's boys was killed fully two weeks ago by a shell.

The days are fairly cold just now, and that damp atmosphere is not by any means welcome. It is so piercing compared with the Canadian climate.

Have you seen any of the P. C. (Presbyterian College) boys lately?

Give my best regards to all the boys.

Yours sincerely,

C. J. LIGHTBODY,
Theology '18.

MANY JEWS IN WAR.

Geneva, Switzerland.—Speaking of the part which the Jews are taking in the present war, the Journal de Geneve says that there are 20,000 in the British army; 50,000 are fighting for Germany; 170,000 for Austria, and 350,000 for Russia. Even Serbia numbers 25,000 Jews among her fighting men. All Jews, with the exception of those in America, are fighting against each other. In the British army there is a unique example of a unit composed entirely of Jews, who receive their orders in Hebrew, and are commanded by Jewish officers. These are young Zionist settlers who were forced to flee from Palestine in order to escape being forcibly enrolled in the Turkish army. From Jaffa, where they first took refuge, they were brought on the Tennessee to Alexandria, in Egypt. Here they were enrolled in the British Palestine battalion, where they form the corps of the Zion mule-drivers. After six weeks' training they were sent to the Dardanelles, where they have been specially mentioned by Sir Ian Hamilton for their splendid conduct.

U. OF T.'S CONTRIBUTION \$7,000.

It was announced that the total contribution of the University of Toronto to the Trafalgar Day Fund now exceeded \$7,000 as a result of recent additions to the original figures.

FLIGHT LIEUT. FISHER SAILS

Has Orders to Report to Admiralty in London.

PTE. MACKENZIE MARRIED

Presentation Made to Three Members of the Fourth Universities Company.

Flight Sub-Lieut. Philip S. Fisher, Arts '16, Royal Naval Air Service, has left for England with orders to report to the Admiralty in London. He will probably be sent to one of the large naval flying schools on the south coast of England to receive final advanced instruction before proceeding to the front. At McGill he was secretary of the Historical Club and of the Literary and Debating Society.

Pte. J. Vernon Mackenzie, H.A., of the Fourth Universities Company, was married on Friday evening in Toronto to Miss Isabelle Chapman, daughter of J. H. Chapman. The Rev. Dr. J. W. Graham officiated, assisted by Rev. A. C. Crews. Pte. Mackenzie is the son of Dr. and Mrs. Mackenzie, Toronto. The honeymoon will be spent at Ste. Jovite.

Ptes. Moore, Nysson and McMahon, of the Fourth Universities Company, former members of the editorial staff of the Montreal Star, were presented with wrist watches at a meeting of the staff held in the Hoffman Cafe on Saturday.

POSITIONS OPEN TO YOUNG GRADUATES

Dr. R. F. Ruttan Receives Request From Ammunition-Making Concern.

Dr. R. F. Ruttan, director of the Department of Chemistry, has received a letter, a portion of which is quoted below, asking him to recommend one or two young graduates in chemical or mechanical engineering to the Remington Arms-Union Metallic Cartridge Co., of Bridgeport, Conn., U.S.A. The letter defines the positions as follows: "We are starting a scheme by which we hope to build up in this plant a corps of young men trained in ammunition-making, so that as opportunities develop, our more important positions may be filled from this corps."

"Our idea is to take several men each year and start them on a course of instruction, shifting them from department to department, over a period of at least a year, during which time they would have no special duties except to imbibe all the information, get acquainted and friendly with our foremen, and place themselves in a way to become valuable members of our organization. During this time of tuition—or apprenticeship, as you may choose to call it—we will pay a salary of seventy-five dollars (\$75) a month. What the future salaries will be it is impossible to say at the present time, as that depends very largely upon the individual ability of the men and the positions which they may be called upon to fill."

"CHARLES F. LINDSAY,
"Research Engineer."

Dr. Ruttan would like to be able to place one or two young chemical or mechanical engineers with Mr. C. F. Lindsay, who is a distinguished McGill graduate in chemical engineering.

EXPLAINED.

"In some of the provincial theatres the arrangements and construction are absurdly old-fashioned," remarked a connoisseur. "Last week, for instance, I was playing Hamlet at Seaport. There was an alarm of fire, and it took no less than ten minutes for the audience to pass through the doors."

"The poor fellow was lame, I suppose," was the cruel comment.

BATTALION DRILLED ON MOUNTAIN SIDE

McGill Band Will Soon Put in Appearance at Head of Battalion.

Saturday proved to be an ideal day for drilling purposes, the weather being just cold enough. At 2.45 the McGill Battalion left their barracks on Metcalfe street, and headed by the bugle band, marched as far as Fletcher's Field. Here the companies separated, and each company commander gave orders to his platoon commanders concerning the afternoon's work. The platoons then distributed themselves over the side of the mountain and spent the afternoon in practising "Platoon in attack." Time after time the different platoons covered the slopes of the mountain, charging an imaginary enemy and discharging imaginary cartridges from the real rifles. This work of a platoon in attack is the same, only on a smaller scale, of the work which a battalion has to accomplish or what a company has to do.

when advancing against the enemy, and it is given to prepare the men for battalion manoeuvres.

At 5.15 the Battalion formed up in mass facing Park avenue and marched back to the old High School, where the companies went to their respective rooms and heard the orders for the coming week. The men were then dismissed.

Saturday was the first time that the men have appeared in their mackinaws, and they needed some instructions on how to wear them. A committee appointed for the purpose have succeeded in securing a one-finger glove, which they consider suitable for the battalion, and after this the men, instead of coming on parade in a variety of gloves and mitts, will present a more uniform appearance. The new gloves will no doubt fulfill the purpose of keeping the students' hands warm this winter, as carrying a rifle in zero weather is extremely cold work.

Men taking the musketry course were given warning on Saturday that they would have to go through the ordeal of taking an examination beginning to-night. The platoon commanders on Saturday tried out men for the position of section commanders. A number of men will likely be tried out for these positions, so every man that knows his work will have a chance of getting his stripes.

Charlie Gibbs expects to have his

PTE. FYLES MARRIED.

Prominent Member of Students' Council in Railway Construction Corps.

Nearly seven months after the event occurred, the marriage of Pte. Lyndon F. Fyles, Sci. '15, Canadian Overseas Railway Construction Corps, and Miss Margaret Julia Saunders, of Athelstan, Que., was announced on Friday. Pte. Fyles was last year representative from Science in the Students' Council and prominent in other branches of student activity. He left as chauffeur to Lieut.-Col. Ramsay, O.C. the Overseas Railway Construction Corps. He is a son of Mr. and Mrs. S. F. Fyles, Abercorn, Que. Miss Saunders is a daughter of Mr. and Mrs. William Saunders, of Athelstan, Que.

H. B. CUSHING MARRIED.

The marriage of Miss Jessie A. Barnard, youngest daughter of the late James T. Barnard, of Hamilton, Ont., and H. B. Cushing, Arts '92, Med. '98, of Montreal, is taking place quietly to-day from the residence of the bride-elect's sister at Niagara.

band in working order now in a short time. Originally the band was authorized for 24 pieces, but this has had to be increased, as over thirty applications have come in.

Consult Anglins Limited for New Ideas on how to Build, Improve or Beautify Office Buildings, Colleges or Homes

EVERY man is interested in building and hopes some day to build his ideal home or factory; or, if already an owner, he is sure to contemplate making improvements. To the owner of central property the vital problem is how to raise the earning power of his property to the maximum.

The question of the home-seeker, who owns a residential lot is, "How shall I obtain my home?"

Our business is building in all its branches. We are always at the disposal of Architects, Engineers or Owners, to furnish estimates and otherwise aid in the solution of their particular problems.

Perhaps you are one of these? If so, we can assist you. We wish to present to the public a concise statement of the scope of operations and the completeness of the organization of Anglins Limited.

In the first place, let us emphasize the fact that our main business is large contract work, executed by our Major Contract Department. We have a large equipment of plant and machinery for buildings and concrete construction of any size, and our recent contracts have extended from Halifax, N.S., to Brantford, Ontario.

Next to this Major Contract Department we have a Minor Contract Department which takes care of our smaller contracts—a Repairs and Alterations Department which covers all work of this kind—and a House Building Department which is prepared to build houses for the individual as well as the syndicate. Each of these Departments is under the supervision of a specialist, trained in his particular work.

Our Major Contract Department is the big end of our business. Recent work carried out by this Department includes large operations for the following owners:—Acadia Sugar Refinery (2 Bldgs.), Dartmouth, N.S.; Bank of Montreal, Brantford, Ont.; Mr. Francis McLennan's Residence, near Quebec; Canadian Hart Accumulator Co., St. Johns, P.Q.; Gananoque Spring & Axle Works, Gananoque, Ont.; Belding Paul Corticelli, Limited, Concrete Bldg. for Montreal Light, Heat & Power Co., St. Lawrence Sugar Refinery, Loyola College (3 Bldgs.), Toilet Laundry Co., Montreal Baby and Foundling Hospital, Edward Seventh School and Gault Bros. & Co., Ltd., all in Montreal; also Bell Telephone Bldg., Sherbrooke; Concrete Stable, Aird's Bakery; Molsons Bank, Cote St. Paul, etc.

Every known type of construction is represented in these buildings which illustrates the wide experience and ability of our staff.

Behind this Major Contract Department we have a most expert and complete staff of estimators and cost clerks, and are therefore able to execute all work efficiently and at minimum cost. Buildings from about \$20,000 upwards are usually included under this Major Contract Department.

We formed our Minor Contract Department because we found it impracticable to carry out the smaller contracts under the same supervision as the big work. This results in greater efficiency and increased satisfaction to the owners because their interests are better safeguarded.

Under this Minor Contract Department we have recently built the following: Bank at Cowansville, P.Q.; Factories at St. Johns, P.Q.; Stores, etc., at Montreal; Church in Maisonneuve.

We have had signal success with small contracts for others, and therefore solicit this class of building work from you.

We have been able to successfully solve the moderate-priced house or home-building problem only within the last few years.

We can now build a single attractive, comfortable house or a group of houses at minimum cost; we are doing this continually.

The business of this House Building Department is to construct houses for the individual and syndicate owners of residential property. We do not build houses for speculative purposes on our own account.

This Department can assist you in building a single house or a two-family house, either attached or in groups; or small apartments or semi-detached houses of concrete construction suitable for developing subdivisions.

No matter what may be the nature of your requirements, all inquiries will be carefully considered.

We have operated a Repairs and Alterations Department for two years, and have found many permanent customers who are glad to patronize us because we supply workmen in all trades. Whether masonry or carpentry, plastering, painting or papering, plumbing, heating, roofing or electrical work, it makes no difference. Also, in cement work we construct floors, walks, walls, etc., both plain and re-inforced.

Our preference is to give a fixed price before commencing this small work, unless otherwise requested by the owner. This practice, also, has met with general approval.

You will be pleased with results if you employ this Department. During the past two years the Minor Contract and Repair Department have successfully completed over \$180,000.00 worth of work of this kind. The supervision is distinct, as with all other Anglins Limited Departments, hence your interests receive first attention.

Anglins Limited is an organization of four separate departments, thus ensuring economy and efficiency as well as satisfaction to the owner. We can refer you to satisfied patrons everywhere.

We aim to build a permanent and efficient business, one that will satisfy the requirements of every owner.

We give prompt attention to all inquiries and follow the work through until you are satisfied with the result.

Our workmanship is the best obtainable and our costs are the lowest when quality is considered.

Speed without rush is gained by careful preliminary planning and we keep in touch with the latest methods and employ them when favorable.

Prices are at the present time lower than ever, and anyone contemplating building should consult Anglins Limited now.

We stand behind our work, so that absolute satisfaction is guaranteed.

Can you Shoot straight?

Keep in practice. Not only because the training may prove useful—perhaps necessary—but chiefly because of the keen enjoyment you will derive from this most interesting sport.

Get out your gun. Buy one if necessary. Fill your pockets with Dominion .22's—the favorite brand of expert marksmen. Then you'll have some real fun.

Dominion Ammunition is *always* accurate and dependable.

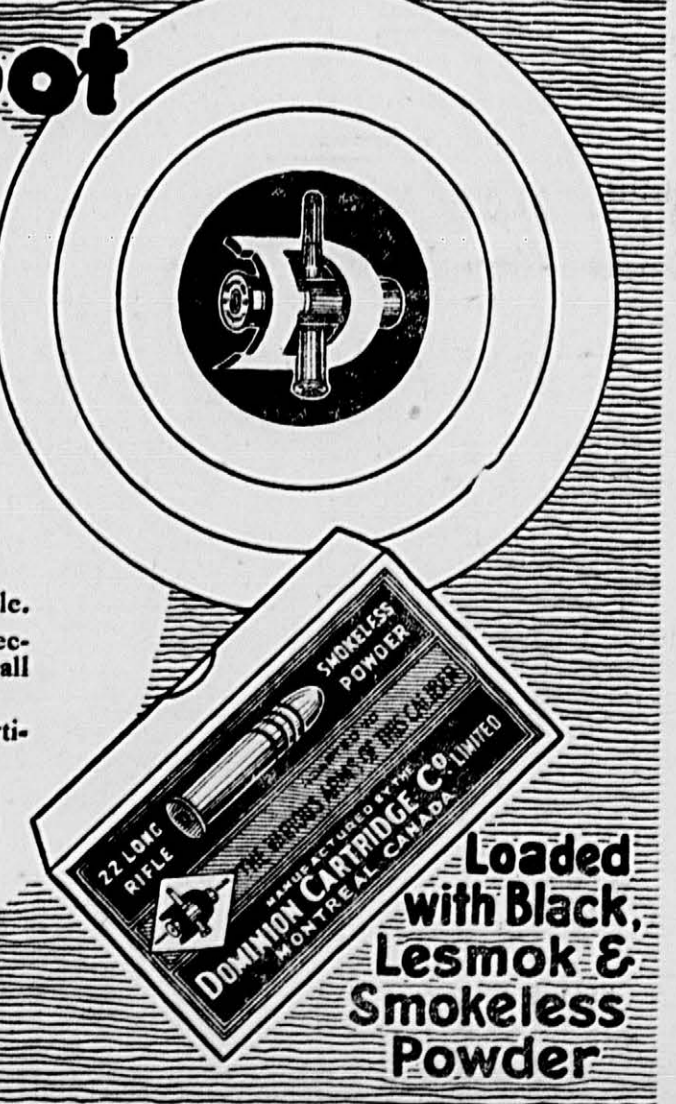

The choicest materials, skillful workmanship, thorough inspection and a system of testing that is scientifically correct—all enter into the production of Dominion Ammunition.

The Dominion .22 Long Rifle cartridge is manufactured particularly for target shooting.

Look for the "Big D" on every box of Dominion Shot Shells and metallics—"the ammunition made wholly in Canada". Sold everywhere.

Send for free package of targets. Address:

INITIAL SMOKER
VERY SUCCESSFUL

The American Club held their first smoker at the Alexandra Cafe on Friday night. Prof. Willard, Honorary President of the club gave a short address as to the duties of the American students attending McGill, in particular as regards the European war and Canada's participation therein.

The various members were called upon during the evening to say a few words and nearly all availed themselves of the opportunity provided to recount some pleasing anecdote or witty story. It is hardly necessary to say that this was probably the most enjoyable feature of the programme.

The business of the meeting was the discussion of the Annual Banquet, to be held this year on November 25th, the American Thanksgiving Day. If the enthusiasm of those present counts for anything it will be the most successful ever. It was laid down as an absolute rule that the banquet be strictly informal.

The refreshments provided by the management of the Alexandra were, to say the least, excellent, and added much to the success of the evening.

STUDENTS ARE
BACK AT WORK

Trouble at University of Ottawa Is Now Over.

OFFENDERS RETURNED

Students Were Chased By Ottawa Strong-Arm Squad In Black Maria.

(Special Daily Correspondence.)

Ottawa, Nov. 5.—The recent strike at the University of Ottawa has been quenched as far as the outward demonstrations go, but it may not be quenched inwardly, as the students resent the stiff regulations imposed. The four students who were temporarily dismissed have been allowed to return. One of the four was an Irish student from New York, the other three being French, so that it was not on account of the bilingual trouble, but the want of greater freedom by the boys.

There are from twenty to thirty boarders in the big yard this year, the majority of them having private rooms, and there is no immediate danger of any of them leaving the university for the present.

The night the students went out they were chased around by the Black Maria, containing a number of Ottawa's strong arm squad. There was a lively time for the students keeping the old tin Lizzie on the go, as they would double through one lane and land out where the police did not expect them. Outside of this, things are rather quiet around the college.

H. L. O'REILLY.

IS KA BIBBLE
HANDY PHRASE

(Continued from Page 2.)

Lieut. George H. McCallum, Sci. '07, has left on active service with the Second Fortress Company, Canadian Engineers.

Edward P. Fetherstonhaugh, Sci. '09, is leaving shortly as lieutenant with a reinforcements draft of the Canadian Engineers. He has been since 1909 professor of electrical engineering at the University of Manitoba, and organized the C. O. T. C. there last session.

A recent letter from Lieut. Don C. Skinner, Arts '15, said that he was safe and well after recent heavy fighting along a twenty-mile front. Don first enlisted with the First Universities Company, securing a commission after a short time. He is a son of A. O. Skinner, St. John, N.B.

H. Bruce Chown, Arts '14, holds a commission with the Artillery at Winnipeg. Lieut. Chown was treasurer of the Arts Undergraduate Society in 1911-12.

A letter has been recently received from Billy Richards, the former McGill star rugby player, who is now a prisoner at Geissen, Germany. Billy is imprisoned with another Ottawa boy, C. Ainsborough. He does not expect to figure in any exchange of prisoners, as he has not been wounded, and will probably have to remain until the war ends. Billy was one of McGill's finest running halves, and could find a hole in any wing line.

Details of how Lieut. Herrick S. Duggan, Sci. '12, of the Royal Engineers, met his death in Flanders, have been received in Montreal in a cable from Captain Hamilton, of the 70th Company, Royal Engineers, to which Lieut. Duggan was attached. Craig Hamilton states that Lieut. Duggan died from shrapnel wounds at 4 o'clock on the morning of the 21st of October, "received while going out to see a fallen officer during the capture of a German trench. He received slight bullet wounds early in the same night in the neck when leading a bomb attack, but afterwards continued work, and distinguished himself throughout with the greatest coolness and devotion to duty. He lies buried at Bethune."

Sir Charles Stewart Tupper, who succeeds to the baronetcy on the death of the Rt. Hon. Sir Charles Tupper, is a McGill grad, of the class of Arts, '05. He is now training for the front, having received a commission in the 79th Cameron Highlanders, Winnipeg.

The same bullet which killed Major Noseworthy at the battle of Langemark also took the life of Capt. Guy Drummond, Arts '09, according to Pte. Dollard, of the 13th Battalion, who has returned to Canada.

Pte. Dollard expressed the opinion that if the Highlanders' line had broken before the wave of poisonous gas, the Germans would have to-day been in Calais. He described vividly the death of Major Noseworthy and Capt. Drummond. The major led a charge down the Ypres road. He was bayoneted by a German, but kept on ahead of his men. A bullet struck him, causing instant death. It went right through his body and struck Captain Drummond in the neck.

Durie MacLennan, Sci. '14, recently addressed the Architectural Association on his experiences at the front. He went overseas with the 5th Field Battery as a gunner and was invalided home suffering from gas poisoning.

A tablet in memory of Gunner Allan I. Richardson, Sci. '11, was recently unveiled in the Church of St. James the Apostle, Montreal. The inscription reads:

"In memory of Allan Irving Richardson, gunner, 5th Field Battery, 2nd Brigade, Canadian Field Artillery. Born at Ingersoll, Ont., 5th May, 1891. Killed near St. Jean at the second battle of Ypres, 29th April, 1915.

"Thou shalt show me the path of life; in Thy presence is the fullness of joy; and at Thy right hand there is pleasure for ever more."

THE BANK OF OTTAWA

A Progressive Banking Institution

GEORGE BURN

General Manager of the Bank of Ottawa and President of the Canadian Bankers' Association.

PRACTICALLY every city of importance in the Dominion has its own local banking institution of which it is naturally proud, and in this respect the Canadian capital possesses the Bank of Ottawa, founded as far back as 1874, and to-day occupying a position of pre-eminence in the banking circles of Canada. This bank has been peculiarly associated with the building up of the capital city, and although it cannot claim priority of place in the magnitude of its operations, it can claim, or it can be claimed for it, that from the Dominion capital it worthily sets an example throughout Canada for banking methods.

The Bank of Ottawa has the reputation of being one of the best conducted institutions of its kind. Its methods are strictly legitimate and in keeping with the best traditions, and its name stands for stability, caution, and conservation in banking. A glance at the personnel of its directorate is sufficient to indicate all this. The men who occupy seats on the board are: The Honorable George Bryson, president; John B. Fraser, vice-president; Sir Henry N. Bate, Russell Blackburn, Sir Henry K. Egan, David McLaren, Denis Murphy, the Honorable Sir George H. Perley, Acting High Commissioner for Canada in London, England, and Edwin C. Whitney. These gentlemen represent interests of great value. They comprise men whose lives have been spent in banking, commerce, or the exploitation of the great natural resources of Canada, and they bring to bear on the direction of the affairs of the bank all the business acumen that has made them each and all successful.

Necessarily the history of the Bank of Ottawa includes periods in the Dominion's career of alternating prosperity and depression. There is no institution in a country's industrial life that is so reliable a barometer of the state of a country's affairs as a big bank whose operations extend from one end of it to the other, and gazing over the tabulated record of the Bank of Ottawa it is a comparatively easy task for one acquainted with the history of the country to pick out the years that were lean. There have been no meteoric advances followed by meteoric declines in its affairs and the measure of steady progress evidenced by the bank's statements is remarkable.

The principal officers of the Bank of Ottawa are:—General Manager, Mr. George Burn; assistant general manager, Mr. D. M. Finnie; Chief Inspector, Mr. W. Duthie.

Mr. Burn is a native of Thurso, Scotland, where he was born April 10, 1847. He began his banking career with the Royal Bank of Scotland, and coming to Canada joined the staff of the Royal Canadian Bank of Toronto. He was appointed general manager of the Bank of Ottawa in 1880. The Bank of Ottawa under Mr. Burn's management has gone forward from year to year and decade to decade steadily building itself up on the soundest principles and conservative practice, from a local institution of two officers to one represented by ninety-five offices, including nearly all the large centres between Montreal and the Pacific Coast. Its general manager has become known throughout the Dominion as a banker of outstanding personality. For many years he has been an active member and a vice-president of the Bankers' Association, and in January last was elected to its presidency. His residence at Ottawa, in addition to his personal qualifications, has caused him to be in frequent demand when negotiations or communications with the government were being carried on. His active services at such times as the periodical revisions of the Bank Act are well known, and he was also, with others, called into consultation in the crises caused by the outbreak of the war in August, 1914. Mr. Finnie was born in Peterhead, Scotland, July 10, 1849, and had a sound business and banking training there. He came to Canada early in life and joined the Bank of Ottawa at its inception in 1874, taking the management of the only branch the bank then had. This was at Arnprior. Later he was made manager at Ottawa, and subsequently was appointed to his present

ARTS AND MEDICINE
MEET ON WEDNESDAY

"Pep" Paisley and Capt. D. B. Gillmor Will Act as Referees.

The first of the inter-faculty Rugby games will take place between Arts and Medicine on Wednesday at 3.30 p.m. The winning team will play Science on Friday at the same hour.

There has been a rule established that in order to be eligible for the letter M, a man must play at least 75 per cent. of the halves. Captain D. M. Gillmour and "Pep" Paisley will act as referees.

R. V. C. BASKETBALL.

There will be a basketball practice in the R. V. C. to-day at 5 o'clock. A large attendance is requested.

HARVARD DEFEATS
PRINCETON BY 10-6

Princeton Players Uncertain Of Their Signals and Game Unspectacular.

Princeton, N. J., Nov. 8.—Harvard defeated Princeton on Saturday for the fourth straight year by the score of 10 to 6.

The score is represented by a touchdown by Harvard and goal from touch-down, and a field goal by Capt. Mahan. Princeton's score was made on two field goals.

The game was devoid of any spectacular features. At times it dragged, especially so when Harvard was in possession of the ball. The crimson players appeared to be uncertain of their signals and frequently delayed the game while getting together on the next play.

King scored Harvard's touchdown in the first period, and Mahan made the score 10 with a field goal in the second period. Tibbet, Princeton's reliable kicker, scored a field goal in the second period and repeated the performance in the third quarter.

The weather was fine and a great crowd saw the game.

position. Mr. Finnie has been closely identified with several important public companies. Mr. Duthie, a native of London, England, entered the bank's service in 1897, having previously had ten years' experience with the Ontario Bank. He was appointed inspector in 1905, and chief inspector in 1910.

FOUR YEARS' RECORD.

How steadily the Bank of Ottawa has added to its capital and reserve funds, increased its deposits and enlarged its profits, may be seen from the subjoined figures.

These figures present in an impressive way the record of the efficient service the Bank of Ottawa has rendered to the productive and commercial interests of Canada, meanwhile continually augmenting its own strength and thus being in a better position than ever to afford sound service in the future.

ABSTRACT FROM ANNUAL STATEMENTS OF THE BANK OF OTTAWA						
	1884	1894	1904	1914	Dividend	Amount
Capital Paid-up	\$999,580	\$1,000,000	\$1,479,547	\$3,588,303	\$2,747,991	7
